- Python

Technical

- Research Design
- Project Management
- Technical Writing
- Quantitative Methods
- Qualitative Methods
- EDA
- Machine Learning
- Statistics
- Data Visualization

Other:

- Organization
- Data Storytelling
- Risk Management
- Stakeholder Communication
- Time Management
- GDPR

Education

American University	Master of Science Certificate in Data Science	2026
Aberystwyth University	Master of Arts in History and Heritage (2:2)	2024
Loyola University	Bachelor of Arts in History (2:1)	2022

Projects – you can find all projects on GitHub

Insurance Coverage Prediction | R, Shiny, Machine Learning | [Link](#)

- Built a classification pipeline predicting health insurance coverage risks among working adults in the US, using 2023 ACS PUMS survey data.
- Compared eight classification models to identify the strongest predictors of coverage risks.
- Delivered results through an interactive Shiny App that can be used by anyone, from non-technical to technical stakeholders. Published.

CDC Mortality | SQL, R | [Link](#)

- Analysed US mortality data by demographics such as race, age and region using CDC WONDER data.
- Applied direct standardisation to compute age-adjusted mortality rates alongside crude rates.
- Discovered that crude and age-adjusted rates diverge significantly by race, revealing disparities that raw data alone may obscure.

Portfolio Website |HTML, CSS, minimal JS| [Link](#)

- Designed and built a single-page portfolio website to showcase my own skills and background.
- Implemented responsive layout, interactions and custom styling without a template or site builder.
- Hosted via GitHub Pages

Employment History

Worcestershire County Council

Team Support Officer

United Kingdom

2025 - Present

- Provide a range of support functions (administrative and clerical support) across the Reablement Service.
